PIC/D-12-59
14 January 1959

25X1

MEMORANDUM FOR: [redacted]

SUBJECT: 20X Micrographic Enlarger for Project "C"

1. Following our last Project "C" briefing at PIC the military services have responded to us with indications of their needs for the Eastman Kodak 20X micrographic enlarger which is currently being developed. According to the latest figures which I have, the following pattern of service need has been established:

U. S. Air Force - 3
U. S. Army - 1
U. S. Navy - 1

2. I thought that you should have this information for use in discussions with Ed Green because as you well know the unit cost for this item will drop very appreciably if four or five are being developed instead of the one for PIC alone.

3. The next step is to determine how the military services shall proceed to transfer the appropriate amount of funds in each case to the Project in order that their requirements can be officially expressed and patterned. Discussions of this point might be unnecessary if the mechanics is all set up at Project but if there are details to be firmed here I would designate my Executive Officer, [redacted] to provide you with any of the views or information that you might need from PIC in regard to this subject. 25X1

ARTHUR C. LUEHRING
Director,
Photographic Intelligence Center
